

Friends of Taupō Swamp & Catchment

Who are we?

Friends of Taupō Swamp & Catchment (FOTSC) is a voluntary environmental group based in Porirua City. We exist in order to protect and enhance the special values of the Taupō Swamp, its connected waterways & its catchment for the benefit of the community

What do we do?

We work with local, regional & national environmental bodies, landowners and the community to advocate for this significant ecological site

Our projects include

- Community education and engagement through workshops & volunteer working days, our website and social media
- Engagement with key parties who have an interest in future urban development within the catchment
- A five+ year restoration project of the southern end of the Taupō Swamp, Plimmerton, on land owned by the Porirua City Council, led by FOTSC and calling upon keen volunteers
- Timely submissions to local and regional planning hearings which may impact on this area

Want to get involved? Any time or skill you can offer will make a difference
